Concentric Circle Command

1026 kbadmin April 14, 2022 CAD Commands 0 8366

(Enhancement) CONCENTRIC(C) option is newly added in circle command, you can input radius several times to create many concentric circles after specifying the circle center, with this new option, you can get the concentric circle in a simple way.

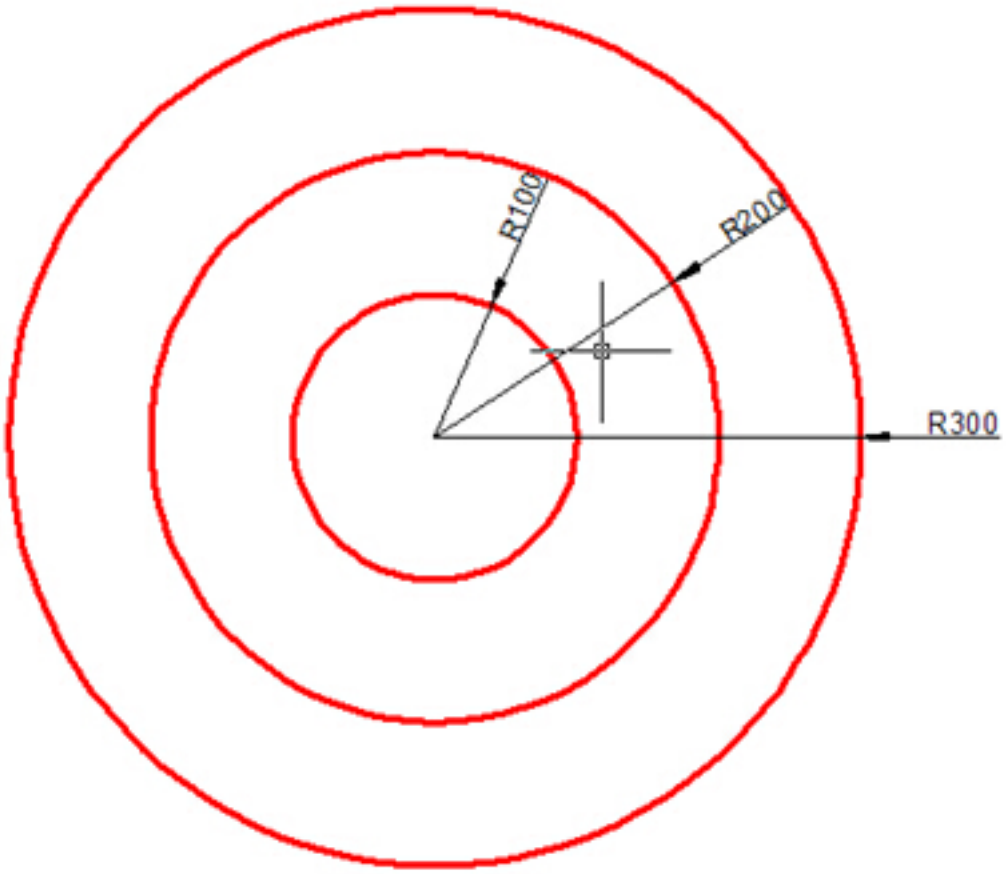

Figure 1-6

Practice example:

To draw the concentric circle in Figure 1-6, the steps as below:
1. Execute circle command and input concentric option or click the concentric icon in ribbon panel.
2. Specify center point for circle:
3. Specify the radius of the circle or [Diameter] <400.0000>:100
4. Specify the radius of the circle or [Diameter/Undo] <100.0000>:200
5. Specify the radius of the circle or [Diameter/Undo] <200.0000>:300
