## How do I pack my files with eTransmit?

1067 kbadmin June 30, 2021 Tips & Tricks 0 5844

Do you often need to send your drawing files to your customers? But quite often they have troubles to see all drawing resource attached like reference paths broken, or don"t include the plot style table, custom fonts, etc.

There is a tool that can be very useful for these situations: eTransmit will pack your related files into a transmittal package. Includes your reference files, plot style table, reorganize your reference path, material textures, data link files, etc.

You can open eTransmit by accessing GstarCAD

menu: File>eTransmit.

Elle	Edit View Insert Farm	ut Jools Draw Tegt	Dimension Mor	sty Window	Help	Egeness	
	New	CTRL+N	v Manage	Export	Help	Express	
3	Open	CTRL+O					
	Close		U				
	Import		New.		10	Send	
	Attach		interes.			Send	
8	Save	CTRL+S	🚰 Open		<b>G</b>	E-Transmit	
	Save As	SHEFT+CTRL+S			-		Creates a new drawing file
9	Export		and a state				
	eTransmit		Save AL.				
6	Send						
-	Page Setup Manager		A Print_	,			
ð	Plotter Manager		1944				
ġ.	Plot Style Manager		Pablish.				
1	Plot Preview		100				
0	Plot	CTRL+P	Send	,			
G	Publish			Unider +			
_	Drawing Utilities	•	Drawing	CONDAL 1			
6	Drawing Properties		Close	,			
	Drawing History		- com				
8	Exit	CTRL+Q					Options (Setit

Click Transmittal setup and click modify. You"ll see a lot of option that you can use. You can change path option, so all your files will be included in one folder. So you don"t have to worry your path will be broken.

Res Tree Res Table	Select a transmittal setup SECURIDAD	
See User Added Files     Dening Files     See ALIGN TOOL dwg     WECHANICAL DRAWING dwg     WECHANICAL DRAWING dwg     WECHANICAL DRAWING dwg     PERCENTION CENTER dwg     PUBLISH ENHANCEMENT dwg     PARAMETRIC CONSTRAINT SAMPLE 2 dwg	Setup description:	Nev Feran Nod
Included 6 file(s), 3080401 Add File	PREVIEW	

Or you can simply bind it all to a master file. Some cad users are not familiar with external reference, so sometimes bind them all in master file can be a good idea.

You can also choose what types of file to be included. Sometimes you don"t want your partner to have excel file in data links. Or maybe they already share same fonts or material textures.

If you will send this file to your partner using old version of GstarCAD, you can choose to convert it all first.
