## How to get high resolution Image from GstarCAD?

1123 kbadmin April 3, 2016 <u>Tips & Tricks</u> 0 6575

Do you need to create a high resolution image from lines, arcs and other objects in your drawing? No, this is not about rendering. Just you can just plot your model/layout.

Try to open your plot dialog box. You can see a plotter namedPublishToWebJPG.pc3. Use it, you will get a JPG image with fair quality.

Page Setup					Plot style table (pen assignments)

JPEG probably is the most popular image format for presentation. But if it's still not good enough... How about BMP, TIFF, or TGA? You can add more plotters for those file types. Under Printer/Plotter, you will see the Add Plotter option. Click to open it. This will bring you to a wizard window, follow the steps:

- . . . . . . .
- 1. Click next at the first page.
- 2. On the next page, select My Computer. Then click next.

Begin Network Plotter	To configure a new plotter, select one of the following:						
System Printer Platter Madel Select Driver	My Computer						
Import Pop or Po2 Ports	All settings will be configured by an GstarCAD plotter driver, and managed by this computer.						
Ploter Name Finish	<ul> <li>Network Platter Server</li> </ul>						
	All settings will be configured by an GstaCAD plotter driver, and managed by a plotter server.						
	System Printer						
	Use a configured Windows system printer driver, and apply different default values for GistarCAD 2010 vs. other windows applications.						

3. On the next page, you can see a list of manufacturers, and the models. We want to add TIF this time.

4. Select Raster File Formats as manufacturers. Then select TIF option as plotter model.

Start Network Plotter System Phinter	Select your plotter manufacturer and model. If your plotter ian't lated, consult you plotter documentation for a compatible plotter.
Plotter Model Select Driver Import Pop or Pc2 Pots Plotter Name Finish	Optionally, if you have an installation disk containing an HDI driver, choose Hav Disk. A Browse for HIF File dialog box is displayed for you to locate and install th HIF file attached to the HDI driver. Manufactures Manufactures Canon HP HP(Initialized) OCF
	Supported format of this type 3cad Raster TIFF.1.0 - Have Disk

You can also select BMP if you like. Now, you can simply click next and finish through the rest of this wizard. Open your GstaCAD, open plot dialog box. You should see your new plotter there!

Use them to create your image. You should be able to get high quality image from your drawings.
