

# How to Apply Cell Properties to a Group of Cells from an Inserted Table?

1176 kbadmin October 13, 2016 [Tips & Tricks](#) 0 4624

After selecting all the cells by window selection method, you can apply certain properties to those selected cells through Table window. This window offers a range of options for cell edition like adding rows, columns, blocks, field data, merge and unmerge cells, etc. For example you can change the text alignment of a group of cells much faster.
