WIPEOUT Command

(Enhancement) GstarCAD 2017 brings you the WIPEOUT command enhanced with more options. Now this command could use a circle object to be wipeout or even you can pick up a closed polyline object containing arcs. For example, you can explode and outline a block definition shape (car) then join it as polyline then wipeout this polyline and group it with the block definition and place it on your drawing as showing below.
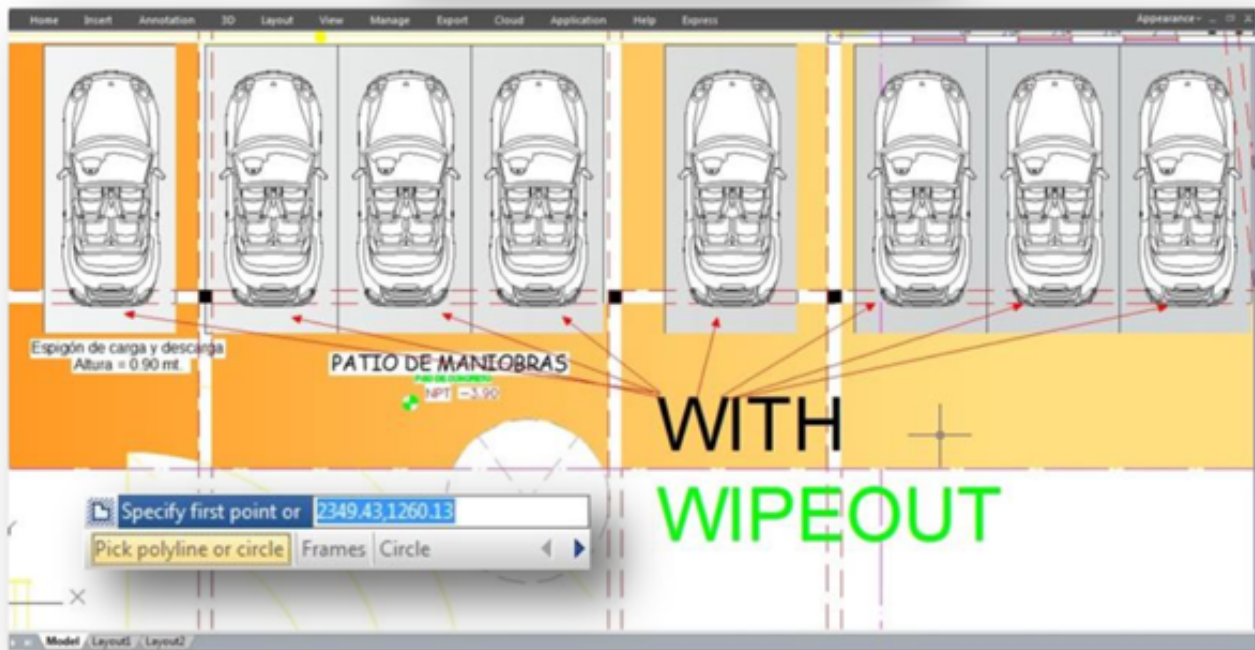

Enhancements - Design, share and visualize your CAD drawing is better with GstarCAD 2017. Best-ever core performance, best-ever functionalities implementation and best-ever innovations are what this CAD platform offers.
