

ACISIN command, import ACIS file

1208 kbadmin June 30, 2021 [Compatible format](#) 0 4426

The ACISIN command is used to import ACIS files and create 3D solids, bodies or region objects.

Command

ACISIN

Ribbon: Insert > Import > Import > ACIS

Menu: Insert > ACIS Files...

Function Description:

Inputting ACISIN in command line, the "Select ACIS File" dialog box pops up, select the file to be imported, the SAT (ASCII) ACIS file could be imported in drawing.

Note: The ACISIN command could only import version of ACIS 7.0 or much lower version of SAT file.
