

How to maintain the attributes value when exploding?

1223 kbadmin June 30, 2021 [Annotation](#) 0 4728

Block attributes is a nice tool to work with. We can use it to preserve text style and size as annotation block. The problem is when we need to explode it somehow, we will lose any information we put in the attribute. To preserve the values, do not use explode command, use BURST instead.
