

# CDATE system variable

1358 GstarCAD MY /KW July 9, 2021 [System Variables](#) 0 3736

## Function Description:

The **CDATE** system variable is used to save current date and time by decimal type of codes.  
(Read-Only)

**Type** : Real

**Saved in** : Not saved

**Initial value** : unknown

The date and time is shown by decimal type beginning with the year. After the decimal point, **CDATE** displays the time using a 24-hour clock.
