CENTERMT system variable

Function Description:

The **CENTERMT** system variable is used to control the text displaying in center horizontal when stretching by grips.

Type : Integer
Saved in : Registry
Initial value : 0
Range : 0,1

The **CENTERMT** could not be applied on the Mtext that stretched by the rule in in-place text editor.

System Variable Value:

0 : when moving corner grips in centered multiple line text, the center grip moves in the same direction, but the opposite grip keeps in place
1 : when moving corner grips in centered multiple line text, the center grip keeps in place, but both sets of side grips move in the stretch direction
