CURSORSIZE system variable

Function Description:

The **CURSORSIZE** system variable is used to determine the cursor size by degrees of screen.

Type : Integer
Saved in : Registry
Initial value : 5
Range : 1% ~100%

The valid range is from 1% to 100%. When setting to 100%, the cursor displays in full screen, users could not see the endpoint of cursor. When setting to smaller than 100%, moving the cursor to the edge of screen, users could see the endpoint of cursor.
