SELECTIONPREVIEW system variable

Function Description:

The **SELECTIONPREVIEW** system variable is used to control the display of selection preview.

Type : Bitcode
Saved in : Registry
Initial value : 3
Range : 0,1,2

The object will be highlighted when pickbox cursor rolling over objects. It means this object could be selected by clicking.

System Variable Value:

0 : turn off
1 : turn on when there is no active command
2 : turn on when prompts to select objects

Note: when the **COMMANDPREVIEW** is on, it ignores the **SEELCTIONPREVIEW** system variable.
