ACISIN command

The **ACISIN** command is used to import ACIS files and create 3D solids, bodies or region objects.

Command Access:

Ribbon : Insert > Import > Import >ACIS
Menu : Insert > ACIS Files...
Command : ACISIN

Function Description:

Inputting ACISIN in command line, the "Select ACIS File" dialog box pops up, select the file to be imported, the SAT (ASCII) ACIS file could be imported in drawing. Note: The ACISIN command could only import version of ACIS 7.0 or much lower version of SAT file.
