ERASE command

The **ERASE** command is used to remove objects from a drawing.

Command Access:

Ribbon : Home > Modify > Erase
Menu : Modify > Erase
Command : ERASE

Command Prompts:

Select object:

Function Description:

The removed objects will not be moved to clipboard. Users could use this command to remove 3d objects, as well as some planes, grids and vertexes. Users could also delete specified objects by entering an option:
Enter "L": remove the latest drawn object.
Enter "P": remove the previously selected object set.
Enter "ALL": remove all objects in drawing. Enter "?": display the list of all options.
