LAYUNISO command

The **LAYUNISO** command is used to restore layers that hidden or locked by the LAYISO command.

Command Access:

Ribbon : Home > Layer > LAYUNISO
Menu : Format > Layer Tools > Layer Unisolate
Command : LAYUNISO

Command Prompts:

Layers isolated by LAYISO command have been restored.
Regenerating model.

Function Description:

This command only restores layers to the previous states (before using the LAYISO command). All changes about layer settings will be kept after using the LAYISO command. If the LAYISO command has not applied on any layers, the LAYUNISO command will restore nothing.
Note: if users do not change the layer settings, they could restore layers by the LAYERP command or press the button.
