Start a Drawing from Scratch

If you want to start a new drawing from scratch, you can use the settings from a default drawing template file.

Use the Startup Dialog Box

If you want to display the Startup dialog box, the following conditions must be met:

The [STARTUP](#) system variable is set to 1 (on).

The [FILEDIA](#) system variable is set to 1 (on).

To start a new drawing, you can choose from various methods in the Startup dialog box.

Use the Select Template Dialog Box

If you want to use the Select Template dialog box directly, the following conditions must be met:

The [STARTUP](#) system variable is set to 0 (off).

The [FILEDIA](#) system variable is set to 1 (on).
