Draw Ellipses

You can draw an [ELLIPSE](#) by using two axes to specify its length and width .

You can choose one of the following methods to draw a ellipse:

- Center (Specify center of ellipse, Specify endpoint of axis, Specify distance to other axis or [Rotation])
- Axis (Specify axis endpoint of ellipse, Specify other endpoint of axis, Specify distance to other axis or [Rotation])
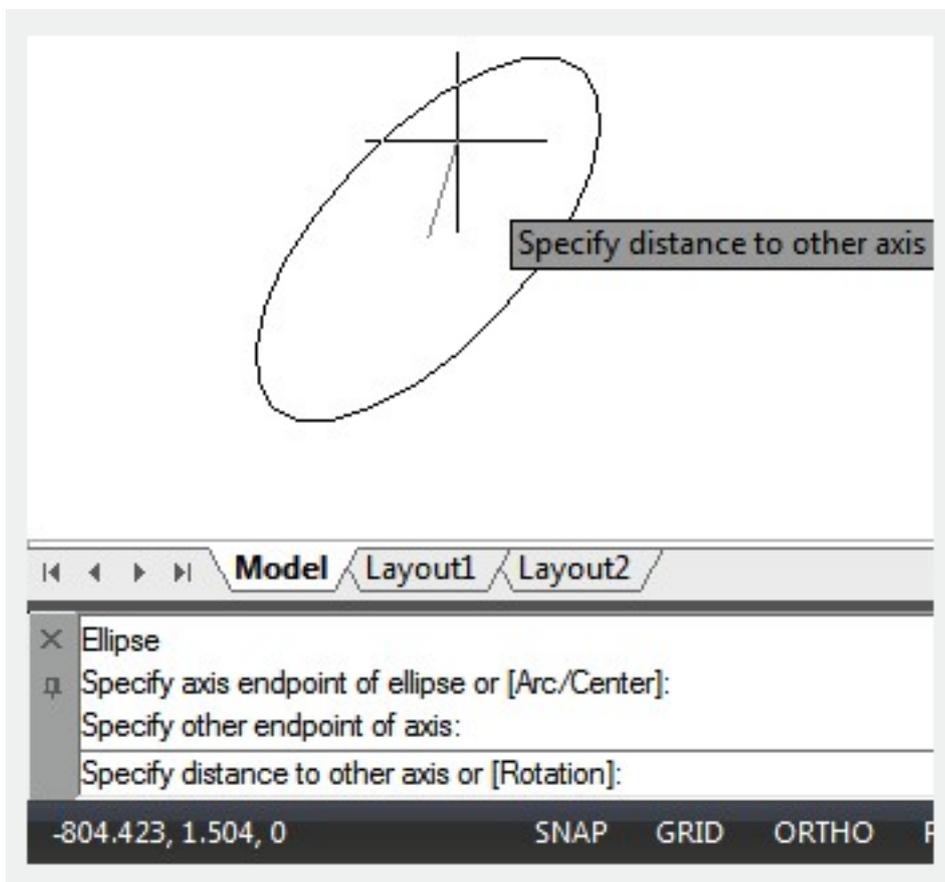

If you turn on Isometric Snap ([SNAPSTYL](#)) in the Drafting Settings dialog box, ELLIPSE has new option: Isometric. You can use ellipses to represent isometric circle's to simulate 3D on isometric plane.
