

# Change R Text

2635 GstarCAD MY /KW November 11, 2021 [Workflow](#) 0 2465

Allows you to edit existing remote text (Rtext) objects.

Menu: Text>Change RText

Command Entry: RTEDIT

Operation steps:

- 1.Start the command.
- 2.Select an RText object.
- 3.You can enter the option to be modified, system will prompt as below.

```
Command: RTEDIT  
Select an RText:  
Current text style: 1111 Text height: 98.393359 Text rotation: 358  
[Style/Height/Rotation/Edit]:
```

4.Input "S" can specify text style; Input "H" can input text height value directly; Input "R" can specify text rotation angle; Input "E" will pop up a dialog box as below.

5. Finish modifying Diesel expression and click "OK" .
