

Delete Duplicate Objects

2679 GstarCAD MY /KW November 30, 2021 [Workflow](#) 0 2020

This function can not only manage overlapped lines, circles, Plines linear objects etc, but can also manage entire coincident blocks, texts, dimensions and regions .Moreover, remove does not simply mean delete, it judges by layer, color, line type and many relevant attributes and can delete or connect coincident parts of 2D and 3D Plines, circles, arcs and overlapping line parts. Using this option can not only delete redundancy objects, but can also avoid editing and printing problems caused by overlapped objects.

Menu : Express tools >Modify> Delete Duplicate Objects

Command Entry : OVERKILL

Start the command and the command line prompts as follows:

Select objects: Select the objects to be compared and deleted

In the overkill dialog box, you can set-up the object comparison, comparison precision (distance between objects) and the object type. After selecting the options according to your need, select OK.
