

Split Cells

2696 GstarCAD MY /KW December 2, 2021 [Workflow](#) 0 2665

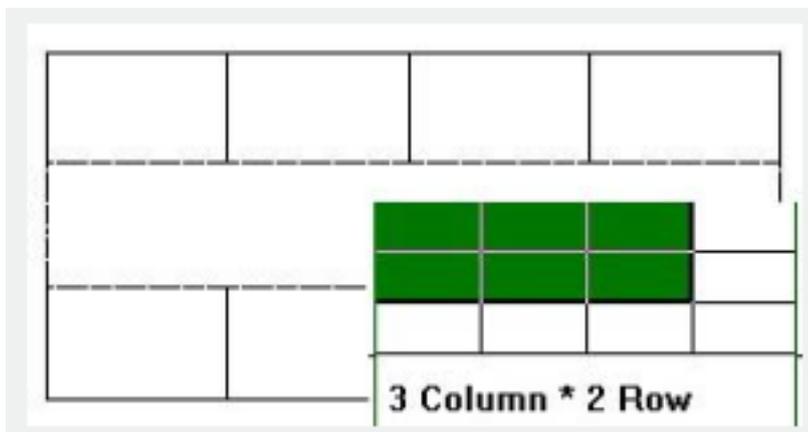

This function is similar to split cells in Excel.

Menu : Express>Table Tools>Split Cells

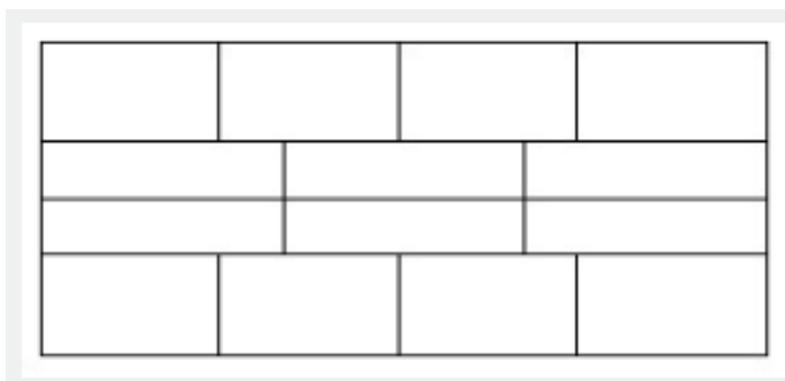

Command Entry : BGFG

Operation steps:

- 1.Start the command.
- 2.Specify the cell which needs to be split. As shown below.

3. Move the cursor, when the rows and columns are a size up, click the mouse and the cell will be split automatically, as shown below.
