# Drag Line

Different to Multiline drag, Drag line will just move the line you selected and other relevant lines will not move.

Menu : Express>Table Tools>Drag Line
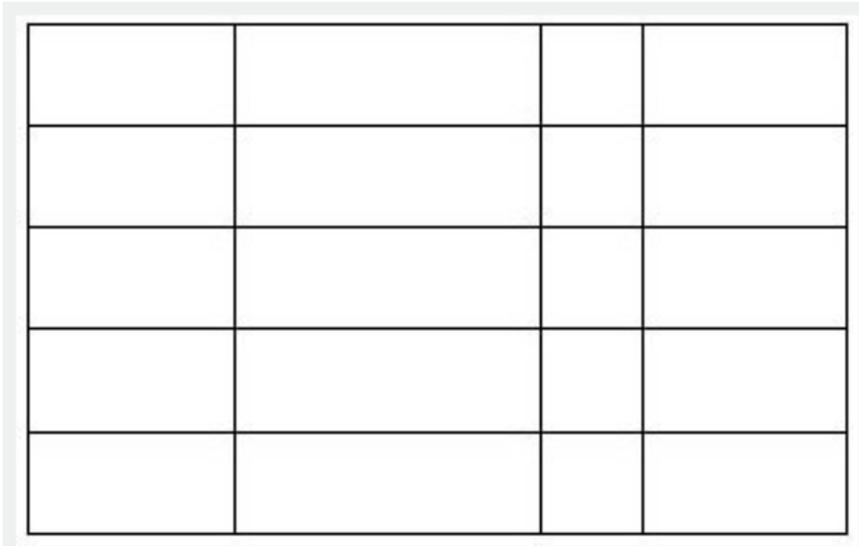

Command Entry : BGST

Operation steps:

1. Start the command.

2. Specify the line of the table for dragging.

3.Specify the place or distance to drag to (left is positive), as shown below.

4.Enter to finish the command, the effect as below.
