# Drag Segment

This command will not change the lines of the whole table, but just move the side line of a cell.

**Menu** : Express>Table Tools>Drag Segment
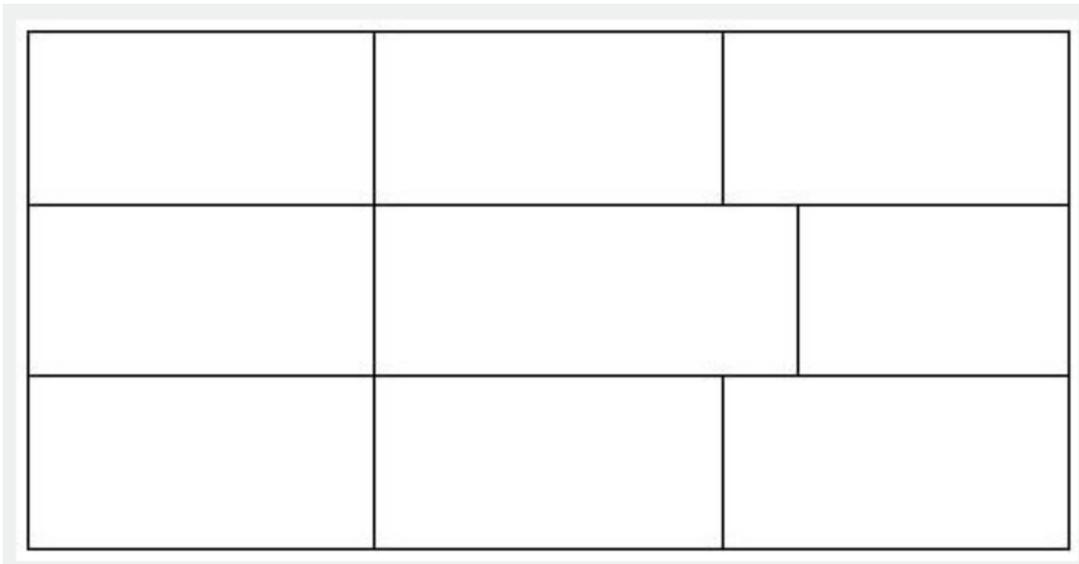

Command Entry : BGJT

Operation steps:

1. Start the command.

2. Specify the line of the table for dragging.

3.Specify the place or distance to drag (left is positive), as shown below.

4.Enter to finish the command, the effect as below.
