Display Multiple Views in Model Space

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Control the Views > Display Multiple Views in Model Space

To see several views in model space at the same time, you can split the drawing area into separate *viewports*. You can save arrangements of model space viewports for reusing at any time.

[Set Model Space Viewports](#)

Viewports display different views of your model. Working on the Model tab, you can split the drawing area into one or more adjacent rectangular views.

[Save and Restore Model Tab Viewport Arrangements](#)

Arrangements of model viewports can be saved and restored by name.
