Clip Raster Images

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Raster Images > Clip Raster Images

With the help of a polygonal clipping boundary, you can clip the display of a raster image in a drawing.

Clipping an image, makes only parts of the image visible and you can increase redrawing speed using it. The clipping boundary can be a rectangle or a two-dimensional (2D) polygon with vertices within the boundaries of the image.
