Create Multiline Text

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Text > Create Multiline Text

A multiline text (Mtext) object includes one or more paragraphs of text that is manipulated as a single object.

You can create Mtext in the In-Place Text Editor or an alternative text editor, you can also insert text from a file. The In-Place Text Editor displays the bounding box with a ruler at the top and the Text Formatting toolbar.
