User Guide > Text

You can create text in various ways, such as single-line text, multiline text, block attribute, field. Text style establishes the font and format settings. Newly entered text uses the current text style.

[Create single-line text](#)

Each line of single-line text is a independent object, you can relocate and modify them individually.

[Create multiline text](#)

Multiline text objects contain one or more text paragraphs, you can manage the multiline text as a single object.

[Create leader text](#)

Creates leader objects related to multiline texts

[Modify text](#)

Text contents, format and properties can be modified.

[Use text style](#)

When you enter text into a drawing, the text font, size, angle and other text characters are determined by the current text style.

[Check Spelling](#)

This command will perform a spell-check of words you input automatically and will also give some word list suggestions.
