HYPERLINK Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > H Command > HYPERLINK

Function Description:

This command is used to attach a hyperlink to an object or modify an existing hyperlink. If you enter -HYPERLINK at the Command prompt, options are displayed, including an option to define an area to associate with a hyperlink.

Command Access:

Menu: Insert > Hyperlink

Ribbon: Insert > Data > Hyperlink

Toolbar: /

Command: HYPERLINK

Alias: /

Shortcut: Select an object including hyperlink and right-click, select Hyperlink and click Edit Hyperlink option

Command Prompts:

Select object:

One of the following dialog boxes is displayed:

- Insert Hyperlink dialog box (for graphical objects that do not already contain hyperlinks)
- Edit Hyperlink dialog box (for graphical objects that already contain hyperlinks)

After you insert a hyperlink, the hyperlink icon is displayed when you move the cursor over the attached object. Users can select the object with hyperlink and right-click to select Hyperlink option. The PICKFIRST system variable must be set to 1 to open files associated with hyperlinks.
