XBIND Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > X Command > XBIND

Function Description:

This command is used to bind one or more definitions of named object in an external reference to the current drawing. The Xbind dialog box is displayed.

Note: The Bind option in the External Reference palette is used to bind files. The XBIND command is used to bind single related definitions.

Command Access:

Menu: Modify > Object > External
Reference > Bind...

Ribbon: /

Toolbar: Reference > Xbind

Command: XBIND

Alias:

/

Command Prompts: /
