UNITS Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > U Command > UNITS

Function Description:

This command is used to control the display of formats and precision of coordinates and angles. The [Drawing Units dialog box](#) is displayed.

Uses can set the display formats, precision and other agreement for coordinates, distances and angles, and then save them in the template, they can also modify these settings in the current drawing.

If you enter -UNITS at the Command prompt, options and gcad Text Window are displayed.

Command Access:

Menu: Application menu > Drawing Utilities > Units/Format > Units...

Ribbon: /

Toolbar: /

Command: UNITS

Alias:

UN

Command Prompts: /
