User Guide > The User Interface > Design Center > Overview of Design Center

You can organize access to drawings, blocks, text styles and other drawing contents using the Design Center.

With Design Center, you can:

- Browse for drawing contents such as drawings or symbol libraries on your computer, on a networked drive
- View definition tables for named objects such as blocks in any drawing file and then insert, attach or copy and paste the definitions into the current drawing
- Create shortcuts to drawings and folders that you access frequently
- Add content such as xrefs, blocks to a drawing
- Drag drawings, blocks to a tool palette for convenient access
