Save and Restore Interface Settings (Profiles)

[GstarCAD 2027](#) · [User Guide](#)

User Guide > The User Interface > Customize the Drawing Environment > Save and Restore Interface Settings (Profiles)

The settings of the drawing environment can be stored as Profiles and you can create profiles for different users or projects. These profiles can also be imported and exported as files to share them.

You can set the Profile information on the Files tab of the "Options" dialog box. The profiles are stored in the system registry and can be exported to a text file (an ARG file).

In the "Options" dialog box, you can use the "Profiles" tab to create and save drawing environment settings as a profile.

You can export or import the saved drawing environment settings as an ARG file to and from different computers.

These files can be used if work environments of a project need copying, restoring or standardizing within a network.
