The Command Window

[GstarCAD 2027](#) · [User Guide](#)

User Guide > The User Interface > The Command Window

The command window is a dockable and resizable window, which can display commands, system variables, options, messages and prompts.

[Enter Commands on the Command Line](#)

To enter a command you can use the keyboard. Some commands also have abbreviated names called *command aliases*.

[Enter System Variables on the Command Line](#)

How certain commands work is controlled by setting system variables.

[Navigate and Edit Within the Command Window](#)

To correct or repeat commands, you can edit text in the command window.

[Switch Between](#)

[The Dialog Box and the Command Line](#)

Instead of using a dialog box or switching back again, you can display prompts on the command line. When you use scripts, this option is most useful.
