3DORBITCTR Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > 3D Command > 3DORBITCTR

Function Description:

This command is used to set rotation center in 3D dynamical observation view. Activate 3D dynamical observation view and use a specified orbit center by the pointing device. If specifying a point beyond the current viewport, the 3DORBITCTR command will ignore the specified point and use the default point.
