

FIELD Command — GstarCAD 2027

3061 kbadmin September 25, 2026 [Command Reference](#) 0 22

FIELD Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > F Command > FIELD

Function Description:

This command is used to create a multiple text with a field that can be updated automatically as the field value changes. The FIELD command can insert all kinds of texts except tolerances. The FIELDEVAL system variable and the UPDATEFIELD command determine how fields are updated. The [Field dialog box](#) is displayed.

Command Access:

Menu: Insert > Field

Ribbon: Insert > Data > Field

Toolbar: /

Command: FIELD

Alias: /

Shortcut: Right-click when editing text by In-place Text Editor and click "Insert Field"

Command Prompts: /
