GCCOINCIDENT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > G Command > GCCOINCIDENT

Function Description:

Constrains two points to coincide, or constrains a point to lie on a curve (or the extension of a curve).

Command Access:

Menu Item: Parameters (P) > Geometric Constraints (G) > Coincident (C)

Ribbon: Parameters > Geometric > Coincident

Toolbar: /

Command Line: GCCOINCIDENT

Command Alias: /

Command Prompts:

Select first point or [Object (o)]: Select the first point or object that needs to coincide

Select second point or [Object (o)]: Select the second point or object that will coincide with the first one

Operation Steps:

1☐As shown in the figure (which is not provided here), select the endpoints of two lines that are close to each other and add a coincident constraint.

2☐The endpoints of the two lines will be constrained to coincide, meaning they will occupy the same location in the drawing.
