GCPARALLEL Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > G Command > GCPARALLEL

Function Description:

Makes the selected lines parallel to each other.

Command Access:

Menu Item: Parameters (P) > Geometric Constraints (G) > Parallel (A)

Ribbon: Parameters > Geometric > Parallel

Toolbar: /

Command Line: GCPARALLEL

Command Alias: /

Command Prompts:

Select first object: Select the first object that needs to be parallel.

Select second object: Select the object to be parallel to the first one.

Operation Steps:

1☐As shown in the figure (which is not provided here), select two lines to apply the parallel constraint.

2☐The two lines will be adjusted so that they are parallel to each other.
