GROUPEDIT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > G Command > GROUPEDIT

Function Description:

This command is used to add and remove objects from the selected group, or rename a selected group.

In the drawing area, selects a group or enter the name of a group. If a selected object is not included in a group, you are prompted again.

Command Access:

Menu: /

Ribbon: Home > Groups > Group Edit

Toolbar: /

Command:

GROUPEDIT

Alias: /

Command Prompts:

Select group or [Name]:

Enter a group name or [?]:

Enter an option [Add objects/Remove objects/REName]:

Name

Selects a group by entering its name.

?

If you only know the first letter or the last letter of the group name, you can select this option and enter the letter you know, and it will tell you the complete group name.

Add objects

Adds objects to the selected group.

Remove objects

Selects and removes objects from the selected group.

REName

Enters a new name for the selected group.
