EXPORTPDF Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > E Command > EXPORTPDF

Function Description:

This command is used to generate a PDF file from a single layout, all layouts, or a specified area in model space.

The [Save As PDF dialog box](#) is displayed. Users can use this dialog box to override the device driver's page setup options, add a plot stamp and change file options.

To export layouts to a PDF file, invoke this command from a layout. After that use the Save As PDF dialog box to specify whether to export that layout only or all the layouts in the drawing. To export model space to a PDF file, invoke this command from model space. After that use the Save As PDF dialog box to specify the area you want to export.

Command Access:

Menu: File > Export > PDF

Ribbon: /

Toolbar: /

Command: EXPORTPDF

Alias: /

Command Prompts: /
