## Enhanced Attribute Editor Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > E Command > EATTEDIT > Enhanced Attribute Editor Dialog Box

### Function Description:

Edits the values, text options, and properties of each attribute in a block.

## **Dialog Box Options:**

### **Block**

The name of the block whose attributes you are editing.

### **Tag**

The tag that identifies the attribute. Make sure that the tag name is unique.

### **Select Block**

Temporarily closes the dialog box while you select a block with your pointing device.

### **Apply**

Updates the drawing with the attribute changes you have made and leaves the Enhanced Attribute Editor open.

### **Attribute tab**

Displays the tag, prompt and value assigned to each

attribute. You can change only the attribute value.

## Text Options tab

Sets the properties that define the way an attribute's text is displayed in the drawing. Change the color of attribute text on the Properties tab.

## Properties tab

Defines the layer that the attribute is on and the lineweight, linetype and color for the attribute text. If the drawing uses plot styles, you can assign a plot style to the attribute using the Properties tab.
