[GstarCAD 2027](#) · [Command Reference](#)

Commands > O Command > OCMP > Graphic Compare Dialog Box

Function Description:

It does not only compare two drawings with similar objects geometry and find out the differences but also display the details of any change at the current workspace of your drawing in real time.

Dialog Box Options

Specify Drawing

Offers two options of drawing comparison between select objects on your current drawing or specify files.

- **Select Objects:** Offers two options of objects selection including their base points to be compared.

Select base objects and base point: This option allows select all objects, including a basis point as a first selection set to be compared.

Select compare objects and base point: This option allows select all objects, including a basis point as a second selection set to be compared with the first selection set.

- **Specify File:** Checking this option allows browse two drawing file to be compared known as base and compare file.

Output Drawing

Offers two options of drawing compared output.

- **Insert current document:**
This option allows insert the compared set of selected objects on the current workspace.
- **Export to a file:** This option allows output the compared set of selected objects to a drawing file.

- **Output settings:** You can setup properties like layer, color and linetype for all selected objects to be compared to enhance visual differences between them.

Inserting Compared Objects Set into Current Drawing

To insert compared objects set into the current drawing, first selects the button Select base objects and base point. Then selects all objects as first selection set called base objects and specifies a base point for the base objects. Then selects the button Select compare objects and base point and repeats all previous process mentioned above.

Under the Output Drawing, checks the option Insert current document. If you want to setup visual properties for the compared objects, clicks the Output settings button. After that you can place the compared objects set in a convenient point according your need.
