OLELINKS Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > O Command > OLELINKS

Function Description:

This command is used to update, change and cancel existing OLE links. If there is no OLE link in the current drawing, the OLELINKS command is inactive and the [Links dialog box](#) is not displayed. In order to specify other source applications for nested objects, users can right click to select Ole in shortcut menu and click Convert option to display the Convert dialog box.

Command Access:

Icon: /

Menu: Edit > OLE Links...

Ribbon: /

Toolbar: /

Command: OLELINKS

Alias: /

Command Prompts: /
