OPEN Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > O Command > OPEN

Function Description:

This command is used to open an existing drawing. The Select Files dialog box is displayed.

Users can open or load a portion of a drawing, including specified geometrics in viewports or layers. In the Select Files dialog box, click the arrow next to the Open button and select Open Read-Only.

If the FILEDIA system variable is set to 0, the OPEN command displays a command prompt without dialog box.

Note: If the opened drawing contains macros, the Macros AntiVirus dialog box is displayed.

GstarCAD 2023 supports the opening of ifc format and various third-party drawing files.

Command Access:

Menu: File > Open

Ribbon: /

Toolbar: Standard > Open

Command: OPEN

Alias: /

Shortcut: CTRL+O

Command Prompts: /
