Overkill Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > O Command > OVERKILL > Overkill Dialog Box

Function Description:

Removes duplicate geometry as well as overlapping lines, arcs and polylines. Also combines partially overlapping or contiguous ones.

Dialog Box Options:

Object Comparison Setting

- **Comparison Precision:** Controls the precision with which OVERKILL makes numeric comparisons. If this value is 0, the two objects being compared must match before OVERKILL modifies or deletes one of them.
- **Ignore object property:** Selects these object properties to ignore them during comparison, including Layers, Linetype, Color, Lineweight and Plotstyle.

Object type (Lines Arcs and Plines) and overkill style

- **Plines - Optimize segments within plines:** When selected, individual line and arc segments within selected polylines are examined.
- **Overlap - Combine co-linear objects that partially overlap:** Overlapping objects are combined into single objects.
- **End to End - Combine co-linear objects when aligned end to end:** Objects that have common endpoints are combined into single objects.
