IFCIMPORT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > I Command > IFCIMPORT

Function Description:

This command is used to import BIM models in IFC format. IFC format is a standard for data exchange of construction projects, which usually includes 3D building models, shapes, spatial elements and materials. In addition, to obtain more realistic visual effects, we also support rendering of imported IFC files. You can also open IFC files with the OPEN command.

Command Access:

Menu: /

Ribbon: BIM>IFC>Open IFC Files

Toolbar: /

Command: IFCIMPORT

Alias: /

Command Prompts: /

Operation Steps:

1. Executes the IFCIMPORT command, the Select Files dialog box is displayed, from which you can select the IFC file to import.
2. Click the "Open" button, and the IFC file will be automatically imported into the current drawing, as shown below.
