IGSIMPORT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > I Command > IGSIMPORT

Function Description:

This command is used to import IGES files, enhancing our platform's capability for 3D model data. IGES (The Initial Graphics Exchange Specification) is a common ANSI information exchange standard based on CAD computer aided design & CAM computer aided manufacturing systems. The file format can be .igs or .iges.

Command Access:

Menu: /

Ribbon: /

Toolbar: /

Command: IGSIMPORT

Alias: /

Command Prompts: /

Operation Steps:

1. Executes the IGSIMPORT command, the Select Files dialog box is displayed, from which you can select the IGES file to import. Click the "Open" button, and the IGES file will be automatically imported into the current drawing.
