IMAGEQUALITY Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > I Command > IMAGEQUALITY

Function Description:

This command is used to control the display quality of images. The image quality setting has effect on its performance. It takes longer time to display high quality images. It immediately updates the display without causing a regeneration of the drawing.

Note: It always prints images with high quality settings.

Command Access:

Menu: Modify > Object > Image > Quality

Ribbon: /

Toolbar: Reference > Imagequa

Command: IMAGEQUALITY

Alias: /

Command Prompts:

Enter image quality setting [High/Draft] <High>:

High

Generates images with a high quality.

Draft

Generates images with a lower quality.
