## Interference Checking Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > I Command > INTERFERE > Interference Checking Dialog Box

### Function Description:

Cycles through, zooms and deletes or retains interference objects.

## Dialog Box Options:

### Interfering Objects

Displays the number of interferences found between each set during the INTERFERE command.

- **First set:** Displays the number of objects selected in the first set.
- **Second set:** Displays the number of objects selected in the second set.
- **Interfering pairs:** Displays the number of interferences found among the selected objects.

### Highlight

Highlights interference objects while using Previous and Next to cycle through the objects.

- **Previous:** Highlights the previous interference object.
- **Next:** Highlights the next interference object.
- **Zoom to pair:** Zooms to interference objects while using Previous and Next.

### Delete interference objects created on close

Deletes the interference objects when the dialog box is closed.
