VPSYNC Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > V Command > VPSYNC

Function Description:

This command is used to synchronize one or more layout viewports to a master layout viewport to have the exact locations match up, and all synchronized viewports use the zoom factor of the master viewport. It is essential for printing super-long drawings separately or matching up maps precisely.

Command Access:

Menu: Express > Layout Tools > Synchronize Viewports

Ribbon: Express > Layout > Synchronize Viewports

Toolbar: ET: Layout Tools > Synchronize Viewports

Command: VPSYNC

Alias: /

Command Prompts:

Select master viewport:

Select viewports to be aligned to master viewport:
