VSCURRENT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > V Command > VSCURRENT

Function Description:

This command is used to set the visual style in the current viewport.

Command Access:

Icon: /

Menu: View >

Visual Styles > ...

Ribbon: View > Visual Styles > ...

Toolbar: Visual Styles > ...

Command: VSCURRENT

Alias:

VS

Command Prompts:

Enter an option

[2dwireframe/Wireframe/Hidden/Realistic/Conceptual/Shaded/shaded with Edges/shades of Gray/SKetchy/X-ray/Other] <Conceptual>:

2dwireframe

Displays the objects using lines and curves. In the drawing, the grid, OLE objects, linetypes and lineweights are all visible.

Wireframe

Displays the objects using lines and curves and a colored 3D UCS icon.

Hidden

Displays the objects using 3dwireframe and hides lines on the back.

Realistic

Makes the objects colored and objects edges smoothed. The objects are shown with materials attached.

Conceptual

Makes the objects colored and objects edges smoothed. The objects used a transition color between cold and warm colors.

Shaded

Creates smoothly shaded models.

Shaded with edges

Creates smoothly shaded models with visible edges.

Shade of gray

Creates a gray color effect by using the monochrome face color mode.

Sketchy

Creates a hand-sketched effect by overhanging and jittering.

X-ray

Changes the opacity of the entire surface of scene, makes it partially transparent.

Other

Specifies a visual style by name.
