User Guide > Installation

Installation

Users can visit www.gstarcad.net to download GstarCAD 2027 to your computer or server.

GstarCAD 2027 Install Wizard will guide the user to install the software in the operating system completely and successfully.

Please follow the steps below to install GstarCAD 2027:

1. Double-click Setup.exe to start the installation wizard. The installation will officially begin after the decompression page pops up, and the subsequent installation interface will guide you through the process. The first load requires decompression.

2. On this page, you can customize the installation path and view more settings, or directly click the "Install" button to install with default settings.

3. On this page, you can view and set more options.

4. Click "Install" to start the installation. During the installation progress, feature carousels will pop up in sequence, and after the progress bar is full, it will enter the next page.

5. When the installation is complete, a "Workspace" selection page will pop up, allowing users who are accustomed to the traditional interface to set it here, as shown in the figure.

6. Click "Next" to complete the installation.
