TABLESTYLE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > T Command > TABLESTYLE

Function Description:

This command is used to create, modify, or specify table styles. The Table Style dialog box is displayed. You can specify the current table style to determine the appearance of all new tables. A table style includes settings for background colors, margins, borders, text, and other table characteristics.

Command Access:

Menu: Format > Table Style...

Ribbon: Annotation > Table > Table Style...

Toolbar: Style > Table Style...

Command: TABLESTYLE

Alias: /

Command Prompts: /
